DATA ACQUISITION TRAINING WORKSHOP

TRAINING WORKSHOP

This workshop focuses on data acquisition and data logging, guidelines for optimising data acquisition systems and demonstrations. Participants have an opportunity to ask questions and take part in practical sessions. All sessions allow for discussion of user specific application issues.

WHO SHOULD ATTEND

- Users wanting to understand the fundamentals of data acquisition and data logging.
- Users wanting to optimise their dataTaker data logger.
- Employees responsible for data acquisition and data logging equipment.
- Potential users of dataTaker data logger.

DAY 1

GETTING THE MOST OUT OF YOUR PROGRAM

Module 1

- Introduction to dataTaker logger.
- Introduction to dEX software.
- Introduction to dataTaker concepts.
- DataTaker Native Format - My First Program.

DAY 2

ADVANCED PROGRAMMING

Module 1

- Advanced data acquisition and data logging programs.
- Optimising your data logger.
- Advanced Sensor/Device Programming.

DAY 3

APPLICATION PROGRAMMING

Module 1

The third day is allocated to advanced programming and can be tailored to your specific project requirements.

☐ **Module 1** ☐ **Module 2** ☐ **Module 3**

Name _____ Position _____ Email _____

Postal Address _____

Company/Organisation & Department _____ Telephone _____

Please email this completed form to anthony@alllifedata.com.au to confirm your requirements

(please complete) Which dataTaker logger does your Company use?

☐ DT5xx Range ☐ DT80/85 Range ☐ DT80G/85G ☐ DT800 ☐ Other

Quick Survey Please advise area of application interest

☐ Modem and Telemetry ☐ Thermometry ☐ Bridges & Strain Gauges

☐ Interfacing to third party ☐ Cloud Based Data Monitoring ☐ Interfacing to third party

☐ Other _____ (please specify)
