

dEX Release August 2015 Accelerating Innovation in Data logging and Monitoring

WORLD'S FIRST DATA LOGGING APP WITH FULL FUNCTIONALITY

dEX for iPad and Android Tablets
The easiest way to manage your logger network!

An Intelligent logger now with an intelligent user interface!!!

ANDROID APP ON Google play Available on the App Store

Early in 2010, Apple launched the iPad to great excitement and it seems the initial euphoria for tablet technology was well placed. Samsung and others followed, continuing the trend, and the tablet market is now expected to exceed 200 million units in 2015.

Integration of complex physical machinery with networked sensors and software is starting to happen now, through the convergence of machines and intelligent data in what is called the Industrial Internet. The Industrial Internet will transform industry through intelligent, interconnected objects that dramatically improve performance, lower operating costs and increase reliability.

Evolution in the Industrial Internet brings intelligence to remote operations, which enables our clients to visualize and monitor data and provide advanced analytics to improve efficiency to make the world a better place.

In keeping with our program of providing flexibility for dataTaker customers to access real time data, we are pleased to announce the release of **dEX Tablet Apps for iOS and Android platforms, a compatible version of dEX (version 1.72) and a new version of Firmware (version 9.18)** for the DT8x Model range of data loggers. This version of dEX and Firmware supports DT8x Series 2 and later dataTakers, with a paid upgrade service available for DT8x Series 1 logger.

The new firmware 9.18 is now available for distributors to download and will be officially released with links posted to our website on 04-Sep-2015.

New Apple and Android Tablet Apps

- Full programming and data retrieval functions from the mobile device
- Improved Mimics performance compared with earlier versions of dEX
- Setup and display logger data from anywhere
- Multi-lingual support

New dEX Features

- Important bug-fixes and UI improvements highlighted in package V9.16
- Trend chart contains less data points and renders faster

New Firmware Features (see Release Notes for extended detail)

- Important bug-fixes and improvements highlighted in package V9.16
- Support for 8GB+ USB sticks
- Firmware Compatibility with Android Tablet and iPad version of UI

The latest firmware will be available on the website for all customers, with Release Notes and updated User Manual at <http://www.datataker.com/downloadsDT80.php> from 04-09-2015.

dataTaker loggers will begin shipping with dEX 1.72 and Firmware V9.18 pre-loaded from 05-10-2015.
